

# RHV Series

High-visibility edge-lit pictogram sign

## Clarity when it counts

Introducing the **RHV Series**, Ready-Lite's new high-visibility edge-lit pictogram sign. Crafted for high-ceiling spaces such as distribution centres, shopping malls, sports facilities, and transportation hubs, the sleek **RHV Series** offers enhanced visibility during emergencies while also blending seamlessly into everyday built environments.

## Key features

- **Extended observable distance:** 9.7" x 17.5" panel can be viewed from up to 45m/148ft and improves visibility under abnormal conditions. Recommended for long corridors and high ceilings.
- **Form and function:** Aesthetic aluminum housing and acrylic panel are impact resistant and suitable for cold or humid indoor environments -30° to +40°C.<sup>1</sup> Housing available in three colours that will never rust.
- **Robust and efficient electronics:** 120min. battery discharge time with built-in Protection Circuit Module. High Power Factor design consumes less than 3W.
- **Easy installation and wiring:** Surface wall, ceiling, or pendant mount. Includes wire leads and isolated electronics for additional safety.

<sup>1</sup>Consult factory for specific environmental needs.

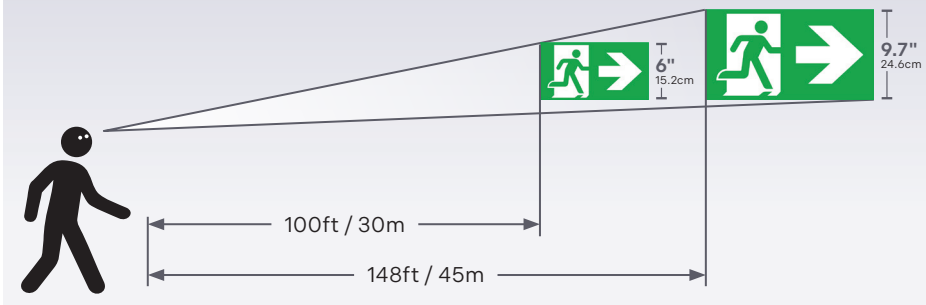

## Visibility meets versatility

- **Customizable panels:** Meet regulatory or site-specific needs with special wording options.
- **Convenient self-testing:** Eliminate manual testing in hard-to-reach installations with optional auto-diagnostics and remote testing.
- **Stands out, subtly:** The sleek and refined edge-lit design delivers on visibility without disrupting decor.
- **Proudly made in Canada:** Engineered with care, quality, and precision right here in Canada.

## Applications

### Extended observable distance

**The RHV Series** isn't just a pictogram sign—it's a carefully engineered safety solution for egress paths, designed to outperform standard LED 6" high pictogram signs. Compared to backlit-window-type exit signage, the RHV Series' edge-lit design offers a more sophisticated look with one thick solid panel that will not kink, fog or frost up, blending functionality with aesthetics.
