**CL Series**
20 A 600 V; transformer rated

**Product specifications**
- Conductor range: 14–10 AWG
- Aluminum tunnel type connectors for both load and line sides
- Circuit closing feature to short out current transformer upon removal of meter
- For overhead hub opening only
- Supplied with screw type ring
- Weatherproof Type 3R enclosure

CT Series
20 A 600 V; transformer rated with compartment for test switch

Product specifications
- Conductor range: 14–10 AWG
- Tunnel type connectors for both load and line sides
- For underground service only
- Meter compartment cover overlaps lower test switch compartment cover; insertion of meter securely holds upper cover in place by means of a catch
- Lower test switch compartment cover securely held by upper cover and a lockout device with an enlarged pad hole (0.375 in. dia.)
- A removable mounting bridge is provided for fastening test switch
- Supplied with screw type ring
- Primarily used in: AB, Sask., Man., Ont., N.B., N.S., P.E.I.

CT-SWL Series
20 A 600 V; transformer rated with test switch

Product specifications
- Conductor range: 14–10 AWG
- Tunnel type connectors for both load and line sides
- For underground service only
- Lower test switch compartment cover securely held by upper cover and a lockout device with an enlarged pad hole (0.375 in. dia.)
- Test switch included as part of these models
- Units are prewired from base to test switch
- Furnished with tamper-resistant device for meter ring
- Weatherproof Type 3R enclosure

BA3 Series
100 A 600 V; shallow

Product specifications
• Conductor range: 6–2 AWG
• Aluminum tunnel type connectors for both load and line sides
• For overhead, underground and combination overhead/underground
• Supplied with screw type ring

• Weatherproof Type 3R enclosure
• Primarily used in: All provinces

Note: Supply from an underground network often requires use of stud type connector. Consult your local utility.

BE2 Series

200 A (main lugs) 600 V; multiple position – 100 A per position stud type

Product specifications

- Conductor range: line: 6 AWG–250 kcmil, load: 6–1/0 AWG
- Aluminum tunnel type connectors for both line and load sides
- Factory prebussed from main lugs to each position
- Combination overhead-underground supplied with hub opening closure plate for underground service
- Hubs to be ordered separately (refer to pages D57–D58)
- Supplied with screw type rings
- Weatherproof Type 3R enclosure
- Primarily used in: All provinces

---
CO1 Series
100 A 120/240 V; combination with or without breaker

Product specifications

- Conductor range (line and load): 6–1/0 AWG
- Aluminum tunnel type connectors for both load and line sides
- For overhead installation
- For underground installation, gutter option must be ordered (G)
- With factory-installed neutral conductor
- Suitable for 120/240 V single-phase service entrance for mobile homes, trailers, temporary services, recreational parks and other commercial and residential locations

- Bottom compartment has provision for 2 pole circuit breaker (max 100 A) 10 kA breakers (22 kA breaker where indicated HI) Siemens (QP, QPH), Eaton (BR), GE (TQL). Only SQD (CHOM) breakers will fit units with suffix SD.
- Supplied with screw type rings
- Weatherproof Type 3R enclosure
- Primarily used in: All provinces

CO1 Multi-gang
200 A (main lugs), 100 A per position 120/240 V; multi-gang combination with or without breaker

Product specifications
- Conductor range: line: 6 AWG–250 kcmil, load: 6–1/0 AWG
- Overhead only – tunnel type connectors for both load and line sides
- Underground only – aluminum tunnel type connector load side (6–1/0 AWG), line side 1⁄4 in. studs
- Supplied with screw type rings
- Weatherproof Type 3R enclosure
- Bottom compartment has provision for 2 pole circuit breaker (max 100 A) 10 kA breakers (22 kA breaker where indicated HI) Siemens (Q), Eaton (BR), GE (TQL). Only SQD (QO) breakers will fit units with suffix SD.
- Primarily used in: All provinces

Approved for copper or aluminum

Diagrams
**HD1**

100 A 120/240 V; flat rate services junction box

**Product specifications**
- 100 A, 120/240 V single-phase weatherproof junction box for flat rate services fed underground such as telephone booths, plastic signs, bus shelters, etc.
- Aluminum tunnel type connector for line side
- Bottom compartment has 2 in., 2⅝ in., 3 in., 3⅛ in. KOs and ⅛ in. (load side) studs to accommodate compression lugs (supplied by utility)
- Top compartment has provision for ABB, Siemens, G.E., Westinghouse type “Q” 2 pole breaker
- Weatherproof Type 3R enclosure
- Primarily used in: Quebec only

**Microlectric**
Highly corrosion-resistant meter sockets

For challenging environmental conditions, such as coastal zones, where corrosion can significantly shorten product life expectancy, Microlectric corrosion-resistant meter sockets are the solution.

The CR (Corrosion Resistant) option is now available on three of our best-selling meter sockets: the BQ2, BE1 and BS2 Series. The CR option offers homeowners durability, functionality and peace of mind for years to come with no more prematurely rusted-out enclosures! With the CR option, meter sockets withstand environmental corrosion and enclosure remain rust-free longer.

**Corrosion-resistant option on selected Microlectric BQ2, BE1 and BS2 models**
- Designed and manufactured in Canada for the Canadian climate – withstands temperature variations from -40°C to 90°C
- Superior resistance to corrosion in all types of environments – ideally suited for coastal and industrial areas
- Suitable for both overhead and underground installations – reduces inventory requirements
- Robust galvanized steel construction
- New elegant and distinctive colour identifies CR option meter sockets
# Microlectric

Highly corrosion-resistant meter sockets

- **Amps/Volts**: 100 A 600 V
- **Conductor range**: 6-1/0 AWG
- **Dimensions (in.)**: H 14-5/8, W 8-1/4, D 4-3/8
- **Weight**: 8 lb / 3.6 kg

### BQ2-TCV-CR

- **Product description**: Ground on neutral
- **Amps/Volts**: 200 A 600 V
- **Conductor range**: 6 AWG–250 kcmil
- **Dimensions (in.)**: H 15-5/8, W 8-47/64, D 5-13/32
- **Weight**: 12 lb / 5.4 kg

### BQ2-TCVGN-CR

- **Product description**: Insulated neutral
- **Amps/Volts**: 200 A 600 V
- **Conductor range**: 6 AWG–250 kcmil
- **Dimensions (in.)**: H 15-5/8, W 8-47/64, D 5-13/32
- **Weight**: 12 lb / 5.4 kg

### BS2-TCVBC-CR

- **Product description**: Ground on neutral
- **Amps/Volts**: 200 A 600 V
- **Conductor range**: 6 AWG–250 kcmil
- **Dimensions (in.)**: H 17-1/8, W 6-47/64, D 5-7/16
- **Weight**: 14 lb / 6.3 kg

### BS2-INTCVBC-CR

- **Product description**: Insulated neutral
- **Amps/Volts**: 200 A 600 V
- **Conductor range**: 6 AWG–250 kcmil
- **Dimensions (in.)**: H 17-1/8, W 6-47/64, D 5-7/16
- **Weight**: 14 lb / 6.3 kg

### BQ2-VGN-CR

- **Product description**: Ground on neutral - Comes with 2 in. hub
- **Amps/Volts**: 200 A 600 V
- **Conductor range**: 6 AWG–250 kcmil
- **Dimensions (in.)**: H 15-5/8, W 8-47/64, D 5-13/32
- **Weight**: 12 lb / 5.4 kg

### BQ2-2V-CR

- **Product description**: Comes with 2 in. hub
- **Amps/Volts**: 200 A 600 V
- **Conductor range**: 6 AWG–250 kcmil
- **Dimensions (in.)**: H 15-5/8, W 8-47/64, D 5-13/32
- **Weight**: 12 lb / 5.4 kg

- Insulated neutral
- Ground lug on neutral

Approved for copper or aluminum
**BS2 Series**

200 A 600 V; oversize enclosure

---

**Diagrams**

- Typical bottom
- BC Bottom 3''
**BS2 Series kit**

200 A 600 V; oversize enclosure with PVC accessories

**Product specifications**
- Conductor range: 6 AWG–250 kcmil
- Aluminum tunnel type connectors for both load and line sides
- For overhead, underground and combination

- Supplied with screw type ring
- Weatherproof Type 3R enclosure
- Primarily used in: Ontario only

Note: Supply from an underground network often requires use of stud type connector. Consult your local utility.

**BS2-TCVFA**

200 A, 120/240; single-phase service

**Product specifications**

- Line #6 AWG to 350 kcmil, load 2 x #6–4/0 AWG
- Tunnel type connectors for both load and line sides
- For underground and above ground service
- Weatherproof Type 3R enclosure

- Designed and manufactured in Canada
- Primarily used in: All provinces
  Manitoba Hydro approved for overhead only

**Application:** When distance is a factor, larger conductors require larger connectors.

**BS2L Series**

200 A 600 V; oversize enclosure lay-in lug

**Product specifications**
- Same as BS2 series with the exception that lay-in type connectors are provided
- Conductor range: 6 AWG–250 kcmil
- Aluminum lay-in type connectors for both load and line sides

- For overhead, underground and combination overhead/underground
- Supplied with screw type ring
- Weatherproof Type 3R enclosure
- Primarily used in: B.C., Ont.

### Factory-installed accessories

Include:
- -5 5\(^{th}\) jaw standard capacity
- -6 5\(^{th}\) jaw full capacity, 6 o’clock position
- -9 5\(^{th}\) jaw full capacity, 9 o’clock position
- -IN Insulated neutral

BS4 Series

400 A (main lugs) 600 V; multiple position with blank compartment 200 A per position

**Product specifications**
- Conductor range: line: dual rated connectors for 1 x 4 AWG–600 kcmil or 2 x 1/0 AWG–250 kcmil, load: 6 AWG–250 kcmil
- Aluminum tunnel type connectors for both load and line sides
- Factory prebussed from main lugs to each position
- Combination overhead-underground
- Supplied with hub opening closure plate for underground service
- Larger hub opening requires use of 3 in., 3⅛ in., or 4 in. hubs unless BS052 adapter plate is used
- Supplied with screw type rings
- Weatherproof Type 3R enclosure
- Primarily used in: All provinces

PE2-CS Pedestal unit
200 A 120/240 V single-phase service

A solution for meter sockets not installed on the side of a residence or building

The PE2-CS integrated pedestal saves installation time and is ideal in applications such as street and highway lighting, park and recreational facilities, irrigation control systems and many more.

Product specifications
• Line and load conductor range 6 AWG–250 kcmil
• Underground service only
• Tunnel type connectors for both line and load side
• Weatherproof Type 3R enclosure
• Designed and manufactured in Canada
• FORTIS BC approved

Applications
• For remote electrical service
• Underground application feed only
• Concrete slab installation

Approved for copper or aluminum

Diagrams
**CO2 Series**

200 A 120/240 V; combination with or without breaker

**Product specifications**
- Conductor range (line and load):
  - 1 AWG–250 kcmil
- Aluminum tunnel type connectors for both load and line sides
- For overhead and underground services
- With factory-installed neutral conductor
- Bottom compartment has provision for 2 pole circuit breaker (max 100 A) 10 kA breakers (22 kA breaker where indicated HI)
- Suitable for 120/240 V single-phase service entrance for mobile homes, trailers, temporary services, recreational parks and other commercial and residential locations
- Factory installed adjustable bracket for field installation of Siemens type QJ,QJH,QR,QRH and SQD TYPE QB and Eaton type ED
- Factory installed 2 pole circuit breaker, 10,000 a rms interrupting capacity (REMOVE RED AND ADD) UP TO 22 kA
- Supplied with screw type rings
- Weatherproof Type 3R enclosure
- Primarily used in: All provinces

Note: Some local utilities require a gutter option for underground services. Order with suffix -G. Please check with local supply authority if mechanical connectors are accepted for underground services.
CO2 Series
200 A 120/240 V; combination with or without breaker
**CO2M Series**

200 A – Single-phase 120/240 V; combination with or without breaker and splitter

**Product specifications**
- Conductor range CO2M, CO2MS, CO2MS-2446, CO2MSU (line and load): 6 AWG–250 kcmil
- Conductor range CO2MSB-200, (line side and load neutral): 6 AWG-250 kcmil, (load side and neutral load): 6 AWG-300 kcmil
- For combination verhead/underground service only
- Cutler Hammer (Eaton) breaker to be field-installed
- With CO2FB braid connector (also available for field installation, cat. no. CO2FB-KIT)
- Primarily used in: Alberta

CO2M Series
200 A – Single-phase 120/240 V; combination with or without breaker and splitter

Diagrams

Diagram as reference only. Please contact your regional inside sales representative for other catalogue numbers and drawings pertaining to this series.
CO22 Series
200 A (main lugs), 200 A per position, single-phase 120/240 V; multiple position combination with or without breaker

Product specifications
- Conductor range: line: 6 AWG–250 kcmil, load: 6 AWG–250 kcmil
- Aluminum tunnel type connectors for both load and line sides
- For overhead and underground services
- Factory pre-bussed from main lugs to each position
- Supplied with hub opening closure plate for underground service
- Internal locking system for covers
- Supplied with screw type sealing rings
- Factory installed 2 pole up to 22Ka breakers type A2A 10 kA or A2N 22kA (HI)
- Eaton type ED breakers
- Comes with adjustable breaker plate to accept installation of Siemens type QJ,QJH,QR,QRH, Eaton type ED and SQD type QB
- Conductor kits are available to facilitate field installation of Siemens type QJ,QJH,QR,QRH, Eaton type ED and SQD type QB, refer to page D65
- Weatherproof Type 3R enclosure
- Primarily used in: All provinces

CO22-U Series
200 A (main lugs), 200 A per position, single-phase 120/240 V; multiple position combination with compartment with or without breaker

Product specifications
- Conductor range: line: single ½ in. stud to accommodate compression lugs (supplied by utility), load: 6 AWG–250 kcmil
- Aluminum tunnel type connectors for load sides
- For underground service only
- Factory pre-bussed from main lugs to each position
- Internal locking system for covers
- Supplied with screw type sealing rings
- Factory installed 2 pole up to 22kA breakers type A2A 10 kA or A2N 22kA (HI)
- Comes complete with blank compartment
- Comes with adjustable breaker plate to accept installation of Siemens type QJ,QJH,QR,QRH, Eaton type ED and SQD type QB
- Conductor kits are available to facilitate field installation of Siemens type QJ,QJH,QR,QRH, Eaton type ED and SQD type QB, refer to page D65
- CO3009A-KIT (ABB), CO3009-KIT (Siemens), CO3009SD-KIT (Square D) and CO3409FB-KIT (Eaton) conductor kits available (breakers not included) see page D64
- Weatherproof Type 3R enclosure
- Primarily used in: All provinces

### Product specifications underground
- 320 A underground 600 V maximum
- Self-contained meter socket with bypass mechanism
- Single-phase service
- Neutral and line side terminations; double 1\(\frac{1}{4}\) in. studs to accomodate compression lugs for underground service (1 x 500 kcmil or 2 x 250 kcmil)
- Load side terminations; tunnel type connectors; dual rated 2 x 250 kcmil
- Neutral load side terminations; tunnel type connectors; dual rated 2 x 250 kcmil
- Supplied with screw type sealing ring
- Weatherproof type 3R enclosure
- Primarily used in: All provinces

### Accessory
- BP250 Connector kit 2 x 250 kcmil
BP320 Series
320 A 600 V self-contained meter socket
FA4B-6T
400 A 600 V; “all in one” transformer rated

Product specifications
- Max. single conductor 600 kcmil Cu or dual parallel conductors 250 kcmil Cu/Al
- Load and line side termination at discretion of utility
- For underground service only
- Meter socket configuration for 6 jaws
- Complete with 6 pole test switch
- Complete with 2 fuseholders and 3 A 32 V fuses
- Installation of current transformer at discretion of utility
- Two 1 in., 1⅛ in., 1⅝ in., 2 in., 2½ and 3 in. bottom KOs
- Permanent red nameplate affixed to front cover warns that removal of meter does not isolate the load terminals; also warning to short circuit current transformer (secondary) before removal of meter
- Weatherproof Type 3R enclosure
- Primarily used in: Alberta

Note: Photo is of an installed meter socket; current transformers are not included.

**JS4 Series**

400 A 120/240 V; single-phase service

### Product specifications
- **Load side terminations:** tunnel type connectors, dual rated for 1 x 500 kcmil or 2 x 250 kcmil
- **Fully wired secondary circuits**
- **Line side terminations:** double ½ in. studs to accommodate compression lugs (supplied by utility) for underground service (1 x 500 kcmil or 2 x 250 kcmil)
- **Permanent red nameplate affixed to front cover warns that removal of meter does not isolate the load terminals; warning to short circuit current transformer secondary before removal of meter on JS4B**
- **Meter socket configuration for 5 jaw meters (can be readily converted to suit meter forms requiring 4 blades)**
- **400/5 A three-wire current transformer provides low current for service metering proportional to higher current draw; Consumer and Corporate Affairs Canada approved for revenue metering (200/5 and 300/5 A also available)**
- **Gutter wiring space provided on left side**
- **Twin covers allow access to either compartment (single cover available on request)**
- **Hub opening closure plate for underground service (All units can be converted to overhead service with addition of conduit hub and JS250 or JS500 tunnel type connector kit)**
- **Hinged bridges and readily removable crossbar with keyholes permit easy wiring without obstructions**
- **Heavy gauge galvanized steel with oven-cured grey enamel finish**
- **For aluminum JS4, see page D52 for product specs and dimensions**
- **Three 1 1⁄16 in., 1 1⁄2 in., 2 in., 2 1⁄2 in., 3 in., 3 1⁄2 in., 4 in. bottom knockouts**
- **Weatherproof Type 3R enclosure**
- **Provincial approval may change without notice. Consult your local utility.**

When ordering any meter socket, add suffix “Z” to meter socket cat. no. to exchange standard stainless steel ring for S102WD model.

### Meter protectors

**Product specifications**

- Meter protector for use in problem areas (trailer parks, playgrounds, conservation areas)
- Steel construction (16 ga. galv. steel)
- Clear, unbreakable polycarbonate front cover, which allows full view of meter revenue reading and serial number
- Sealing and padlocking provision
- Grey painted

Québec Construction Code, Chapter V – Electricity, Article 6-112 (6) requires that the spool rack be tightly bolted and attached to structural members of a minimum thickness of 88 mm overall, if the framed structure is made of wood.

Hydro-Québec, Low-Voltage Electrical Service, Standard E21-10, Article 2.2.1, 2.2.2 and Blue Book read as follows:

2.2.1 Supply and installation
The master electrician shall, at the customer’s expense, supply and install the spool rack in accordance with Code requirements and with the recommendations of the Régie du bâtiment du Québec, particularly to avoid any problem due to vibrations. The customer retains ownership of the spool rack.

2.2.2 Location
The spool rack may be attached to the exterior wall of a building or to a customer pole, service mast or other support structure. The master electrician shall ensure that the service loop is secured firmly to the building in a location not conducive to vibrations, and shall strengthen the structure, if necessary, at the customer’s expense. The location must also allow the meter to be installed in a readily accessible place.

Diagrams

Note: Interior insulation and exterior wall are not shown for more clarity. Figure 2: Spool rack installation (wooden structure). Source: Régie du bâtiment du Québec. Can also be used in all provinces.

**Type W – Aluminum service wedge clamps for use with ACSR, aluminum, AAAC conductors**
- For dead-ending self-supporting drop wire
- Saves conductor – drop wire may be cut to exact length
- Can be attached to bare neutral at any point in the span
- Adjustments in drop wire sag are easily made
- Grips ACSR, AAAC or aluminum conductors

Carlon nonmetallic conduits
Schedule 40 PVC rigid nonmetallic conduits

Product specifications
Certified for underground applications encased in concrete or direct burial. Also for use in exposed or concealed above-ground applications.

- Sunlight resistant
- Rated for use with 75 °C conductors
- Superior weathering characteristics
- Meets CSA standard
- ⅜ in. – 4 in. are FT-4 rated

Carlon PV-Mold
Nonmetallic pole riser system

Carlon PV-Mold is a nonmetallic pole riser system designed to protect communications power cable installed on poles.

Product specifications
- Meets or exceeds requirements outlined in the National Electric Safety Code (NESC)
- Designed in accordance with NEMA TC-19 specifications
- Ultraviolet, cold-temperature and corrosive-atmosphere resistant
- No grounding required
- Belled end fits over each added section or conduit
- Requires no maintenance
- PV-Mold acts as an insulator against electrical shock
- Interchangeable parts and accessories to match specific requirements

Slots are 1⁄4 in. from side to side, and allow for expansion and contraction. Slot dimensions: for sizes 2 in. through 6 in. are 5⁄16 in. wide, 3⁄4 in. long. Slot dimensions: for 1 in. and 1¼ in. are 5⁄16 in. wide, 3⁄4 in. long. Slot spacing: 18 in. from center, beginning 6 in. from end.

For more information on PV-Mold, contact your regional sales office.
Carlon PV-Mold
PV-Mold installation and fittings

Polyethylene vented boots and adapters

Note:
1. A field cut may be needed to accommodate different boot or adapter to Carlon U-Mold size combinations.
2. Recommendation: 2 sets of mounting holes per boot/fitting.
3. When 3 in. or smaller conduit is being used, it’s recommended that the bottom (largest section) of the boot or adapter section be buried 2 in. to 3 in. below ground surface.

Diagram:

![Diagram of backing plate](image)
Installation is easy with PV-Mold pole risers:
1. Install ventilator or duct to riser fittings at the base of the pole.
2. Nail backing plate sections to the surface of the pole. Three nail holes are provided in each section. Place the "U" sections over the cable and backing plate, with belled end at the bottom, and attach using ⅛ in. lag bolts.

### Field installation instructions for Carlon PV-Mold adapters
(for adapters E939JN, E939NR, E939NRT)

**E939JN**
- To transition from 4 in. conduit to 2 in. PV-Mold: Place adapter over conduit, attach to pole using the top and bottom mounting holes, place PV-Mold over top section of adapter and secure PV-Mold to pole.
- To transition from 4 in. conduit to 3 in. PV-Mold: Measure 6.3 in. up from bottom (large end) of adapter and cut. Assemble to pole as described above.
- To transition from 3 in. conduit to 2 in. PV-Mold*: Measure 4.75 in. up from bottom (large end) of adapter and cut. Assemble to pole as described above.

**E939NR**
- To transition from 5 in. conduit to 4 in. PV-Mold: Place adapter over conduit, attach to pole using the top and bottom mounting holes, place PV-Mold over top section of adapter and secure PV-Mold to pole.
- To transition from 6 in. conduit to 5 in. PV-Mold: Measure 7.25 in. up from bottom (large end) of adapter and cut. Assemble to pole as described above.
- To transition from 5 in. conduit to 5 in. PV-Mold*: Measure 4.5 in. down from the top of adapter and cut. Assemble to pole as described above.

**E939NRT**
- To transition from 6 in. conduit to 4 in. PV-Mold: Place adapter over conduit and attach to pole using the top and bottom mounting holes. Place PV-Mold over top section of adapter and secure PV-Mold to pole.
- To transition from 6 in. conduit to 5 in. PV-Mold: Measure 5.25 in. down from the top of the adapter and cut. Assemble to pole as described above.
- To transition from 6 in. conduit to 6 in. PV-Mold*: Measure 9.5 in. up from the bottom of the adapter and cut. Assemble to pole as described above.

* For these transitions, it is not necessary to cut the adapter if desired. If the adapter is not modified, it is recommended that the bottom 3 in. of the adapter be buried below grade.

14 gauge steel, 10 in. diameter, 12 in. depth.

**Used to knurl ground rods in order to increase the pullout value of the compression connection by as much as 20%.
**EZGround grounding systems**

**Ground rods**

**Galvanized ground rods**
- Made of high-strength quality cold drawn steel, (1035) hot dip galvanized
- Meets ANSI CI35.30-1979 requirements

**Copper bonded steel ground rods**
- All EZGround ground rods have a heavy uniform covering of electrolytic copper bonded to a rigid steel core
- Copper ions are forced electrically to join with the steel core, establishing a corrosion-resistant bond between the copper and the steel

Threadless couplings and driving caps for standard copper bonded ground rods

Threadless couplings
- For joining non-threaded, sectional, copper bonded, steel ground rods
- Coupling is manufactured of a high-strength, corrosion resistant, silicone bronze

Threadless driving caps
- Prevent “mushrooming” of ground rod while driving to ensure proper fit of coupling
- Driving cap is manufactured of high-strength, hardened steel

*For connecting grounding conductor to either galvanized steel rod or water pipe. CSA approved for wet locations and for direct burial.

*Reversible.
EZGround types of connectors used in Microlectric meter sockets

**Tunnel type connector**
A tunnel type connector is made of aluminum and is ideally suited for grounding and bonding applications accommodating both copper and aluminum conductor size #6 AWG to 250 kcmil.

**Dual tunnel type connector**
A tunnel type connector is made of aluminum and is ideally suited for grounding and bonding applications accommodating both copper and aluminum conductor size #6 AWG to 250 kcmil.

**Stud connector**
Stud connector is made of zinc-plated steel suited for copper or aluminum wire sizes of #6 AWG to 350 kcmil. Connector is comprised of a stud nut, washer and bell nut.

**Lay-in type connector**
A lay-in lug is made of aluminum and is ideally suited for grounding and bonding applications accommodating both copper and aluminum conductor sizes #14 AWG to 250 kcmil.

**Compression lug**
Made of high-conductivity wrought copper. Supplied by utility based on wire size requirements.
