## TabLok bracket support system

Attaching ExpressTray tray lengths to brackets has never been easier or faster. The TabLok profile eliminates the need for hardware, reducing installation time and cost. Only a screwdriver is required.

The TabLok profile is available in straight bracket lengths, center-hung assemblies, "L" style and "J" style brackets.

See pages C18-C20 for complete ordering information

\*Tabs are designed to be bent from above or below.
