

## Star Teck (ST) series fittings for Teck and ACWU cable

### Suggested specifications for metal-clad cable or Teck cable fittings in hazardous locations:

1. All metal-clad cable fittings for jacketed and non-jacketed interlocked armour cable, continuous corrugated cable or Teck cable shall be approved by a nationally recognized testing laboratory, inspection agency or product evaluation organization.
2. Where corrugated-jacketed, metal-clad cable exposed to intermittent or continuous moisture is terminated into a threaded opening, the fitting shall be watertight type furnished with:
  - a. an elastomeric beveled bushing.
  - a funnel entry, splined gland nut.
  - a non-magnetic, stainless steel grounding device with dual grounding action.
  - a taper threaded hub.
  - a hexagonal body and gland nut as manufactured by ABB (aluminum series ST050-464).
  - a built in sealing O-ring on hub side.
3. With single-conductor cable and/or in corrosive environments, aluminum fittings such as ABB series ST050-464 shall be installed. Where explosion-proof or dust-ignition-proof boxes are required by the code, Star Teck fittings must be used in conjunction with an approved sealing fitting.

### Easy installation

- 01 Prepare cable
- 02 Insert cable
- 03 Tighten gland nut

01

02

03

### Warning:

Always ensure that the system is de-energized before performing any installation.

## Star Teck (ST) series fittings for Teck and ACWU cable

**01 Star Teck (ST series)**  
Star Teck cable fittings are designed to accommodate a broad range of cables, thereby minimizing the possibility of mismatched cables and fittings in the field. They are available in hub sizes from ½ to 4 inches, and will handle outer jacket diameters from 0.525 to 4.340 inches.

Cat. no.	Hub size (in.)	Range over jacket (in.)		Dimensions (in.)		
		min.	max.	A	B*	C
ST038-461S†	¾	0.344	0.535	0.344	2.020	0.995

\* Approximate dimension before installation  
† Only available in steel

### Materials

- **Aluminum:** The catalogue numbers listed at left relate to aluminum fittings. The body and gland nut on hub sizes ½ to 1 inch are machined from copper-free bar stock and 1¼ to 4 inches are made of cast copper-free aluminum.
- **Steel:** To order a steel or malleable iron fitting, add the suffix “S” to the catalogue number (example ST050-464S). The body and gland nut on hub sizes ½ to 1 inch are made of steel and 1¼ to 4 inches are made of malleable iron. Plating is electro-deposited zinc.
- **Stainless steel:** To order a 316 stainless steel fitting, add the suffix “SS” to the catalogue number (example ST050-464SS). Only available for ½ to 2 inch hub sizes.
- **PVC-coated aluminum and steel:** To order, add the suffix “PVC” to the catalogue number (example ST050-464PVC or ST050-464SPVC).

Note - When using fittings on single-conductor cable, aluminum fittings and aluminum locknuts must be used.

### Certifications

- **Type HLA.** CSA Certified Class II, Divisions 1 and 2, Groups E, F, and G; Class III and Enclosure Type 4, Type 4X, Classes I, II and III. Suitable for Class I Division 1 locations when used in combination with a certified Class I sealing fitting. Also suitable for Class I Division 2 when installed in accordance with the applicable electrical code.
- **Complies with IEC requirements for Class I, Zones 1 and 2,** when used in combination with a certified Class I hazardous location sealing fitting.
- **UL Listed Class I, Division 2; Class II, Division 2 and Class III.** Meets sealing requirements for type 4 enclosures. PVC-coated fittings are only approved for ordinary location areas (OLA).
